Women: Are you taking Birth Control pills? No Yes Are you pregnant? No Yes Due date? _____

Financial Agreement

Thank you for choosing Family Dentistry and Orthodontics for your dental health needs. We do not want finances to be an issue for our patients. We understand that it is not always possible to pay your dental bill in full so, we would like to explain our financial options. We invite you to discuss with us any questions regarding our services. The best Dental health services are based on a friendly, mutual understanding between provider and patient.

Please Choose the options that works best for you.

1. Payment is due at the time treatment is rendered. We accept Cash, Check, Credit Card and CareCredit.
2. Dental Insurance- As a courtesy to you we will complete your Insurance form and submit it to the insurance company. Your estimated co-payment for treatment is due at the time treatment is provided. If you fail to bring the required insurance information to your appointments, we will ask that you pay the bill in full and be reimbursed from your insurance company with paperwork provided by our office. Our office does not guarantee that your insurance company will pay for the treatment you receive from our practice. If your claim is denied or the treatment is down-coded and/or alternative benefits given, you will be responsible for paying the full balance amount left on the account at that time. Also, if we are filing an insurance claim for you, we will need a credit card number on file. If insurance has not paid claims within 60 days of filing, we will charge your credit card. Insurance coverage is a contractual agreement between the insurance company and you or your employer. We have no control over this relationship.

_____ Please initial

Our office will not enter into a dispute with your insurance company over any claim, although we will provide the necessary documentation your insurance company requests to settle the claim. Our insurance estimate is based on the basic coverage advised by your insurance company, but just as your insurance will advise, there is no guarantee of payment until payment is made. Again, all we can give you is an estimate. We will assist you in dealing with your insurance company, but the ultimate responsibility lies with you.

If the account is not paid within 60 days of the date of service and no financial arrangements have been made, you will be responsible for legal fees, collection agency fees, interest charges and any other expenses incurred in collecting your account.

3. Monthly payment options – If you need to make long-term payments we can offer financing with Care Credit which offers up to 6 months NO INTEREST financing as well as longer terms with low interest rates. You must qualify for this option. Please do not hesitate to ask us about this option. We may conveniently qualify you right here in the office today.

Returned Checks – A fee of \$25.00 will be charged for any returned checks

Broken Appointments: Please help us keep our costs down. We are a small office and generally see 1 to 2 patients at a time. No-shows are costly for us all. Please be aware of any appointments made by your and later cancelled with less than 48-hours notice will incur a \$75 no-charge.

I authorize the staff to perform any necessary services needed during diagnosis and treatment. I also authorize the provider to release any information required to process insurance claims on my behalf.

By signing below I state that I understand the above information and guarantee this form was completed correctly to the best of my knowledge and understand it is my responsibility to inform this office of any changes to the information I have provided.

Informed Consent Form for General Dental Procedures

You, the patient, have the right to accept or reject dental treatment recommended by your dentist. Prior to consenting to treatment, you should carefully consider the anticipated benefits and commonly known risks of the recommended procedure, alternative treatments, or the option of no treatment.

You do not consent to treatment unless and until you discuss potential benefits, risks and complications with your dentist and all of your questions are answered. By consenting to treatment, you are acknowledging your willingness to accept known risks and complications, no matter how slight the probability of occurrence,

As with all surgery, there are commonly known risks and potential complications associated with dental treatment. No one can guarantee the success of the recommended treatment, or that you will not experience a complication or less than optimal result. Even though many of these complications are rare, they can and do occur occasionally.

Some of the more commonly known risks and complications of treatment include, but are not limited to, the following:

- | | |
|---|---|
| 1.) Pain, swelling, and discomfort after treatment; | 8.) Allergic reaction to anesthetic or medication; |
| 2.) Possible injury to the jaw joint and related structures requiring follow-up care and treatment, or consultation by a dental specialist; | 9.) A root tip, bone fragment or a piece of a dental instrument may be left in your body, and may have to be removed at a later point in time; |
| 3.) Temporary, or, on rare occasion, permanent numbness, pain, tingling or altered sensation of the lip, face, chin, gums and tongue along with possible loss of taste; | 10.) If upper teeth are treated, there is a chance of a sinus infection or opening between the mouth and sinus cavity resulting in infection or the need for further treatment; |
| 4.) Damage to adjacent teeth, restorations or gums; | 11.) Infection in need of medication, follow-up procedures or other treatment; |
| 5.) An altered bite in need of adjustment; | 12.) The need for replacement of restorations, implants or other appliances in the future; |
| 6.) Possible deterioration of your condition which may result in tooth loss; | 13.) Need for follow-up care and treatment, including surgery; |
| 7.) Jaw fracture; | 14.) Prolonged numbness. |

It is very important that you provide your dentist with accurate information before, during and after treatment. It is equally important that you follow your dentist's advice and recommendations regarding medication, pre and post treatment instructions, referrals to other dentists or specialists, and return for scheduled appointments. If you fail to follow the advice of your dentist, you may increase the chances of a poor outcome.

Certain heart conditions may create a risk of serious or fatal complications. If you (or a minor patient) have a heart condition or heart murmur, advise your dentist immediately so he/she can consult with your physician if necessary.

The patient is an important part of the treatment team. In addition to complying with the instructions given to you by this office, it is important to report any problems or complications you experience so they can be addressed by your dentist.

If you are a woman on birth control medication, you must consider the fact that antibiotics might make oral birth control less effective. Please consult with your physician regarding the use of oral birth control medication if your dentist prescribes, or if you are taking antibiotics.

This form is intended to provide you with an overview of potential risks and complications. Do not sign this form or agree to treatment until you have read, understood, and accepted each paragraph stated above. Please discuss the potential benefits, risks and complications or recommended treatment with your dentist. Be certain all of your concerns have been addressed to your satisfaction by your dentist before commencing treatment.
